

Snow & Ice Management

Managing snow and ice on your roof is a critical process. Without proper mitigation and removal, risks pile up.

Avoid damage above and below

Protect your flat roof, and its warranty, from the threats of snow and ice. Protect pedestrians and parked cars from snow and ice sliding off your pitched roof.

How GRS will help:

We will develop a customized, cost-effective plan to handle the challenges winter will bring. Services include:

- **Remove snow load to alleviate pounds per sq.ft.**
- **Manage snow levels to lighten the load**
- **Clear paths to RTUs and remove dangerous snow drifts**
- **Snow shields and rails to prevent slides off pitched roofs**
- **Install temporary perimeter guardrails for added rooftop safety**
- **Clear drainage points for snow melt & runoff**
- **Safe winter access plan for staff & equipment maintenance**
- **Custom crane plan for snow removal with JHA plan approved and in place**

Why choose GRS?

Dealing with snow and ice on a roof is specialized skill. Untrained people using the wrong tools or processes will damage roof membranes and critical components. Our winter teams are certified to work on all major commercial roof systems—they are OSHA trained and understand the risks and best practices for snow roof management.

Built on safety, quality, and craftsmanship

Established in 1992 in Worcester, Massachusetts, Greenwood Industries is now one of the Top 10 commercial roofing and building envelope systems contractors in the United States.

With locations across the Northeast and more than 1,000 people on the job today, we have the capacity and the expertise to perform at any scale. We are signatory to 17 union contracts, because we value the integrity of skilled labor and are committed to providing jobs that sustain families and communities.

Greenwood began on the roof, the heritage of three generations of roofers in our founder's family. Today we are a full-service roof and building envelope company, with engineering, installation, and service divisions, plus our own metal fabrication shops.

The Greenwood group also includes TWC Phoenix, the regional leaders in the fields of waterproofing, air/vapor barriers, masonry services and more.

Whether it's one building or an entire campus, Greenwood Industries is ready to serve your building envelope needs from design to installation and ongoing service.

About Greenwood Building Envelope Services

Greenwood Building Envelope Services is the professional maintenance division of Greenwood Industries. We plan and execute customized programs to maintain, repair or upgrade roof and building envelope systems. We will help protect your building(s) and the business that goes on within. When emergency strikes, we're on call 24-7 for our clients.
